Dear Sir:

Re: United States Patent No. 7,052,273
United States Patent Application No. 10/764,570
For: PREMIXED FUEL BURNER ASSEMBLY
Filed: January 27, 2004
Issued: May 30, 2006
Applicant: Jaswinder S. Sehmbi

In accordance with the provisions of 37 C.F.R. 1.322(a)(1), the Office is requested to issue a Certificate of Correction. The applicant has attached a Certificate of Correction form PTO/SB/44. The Certificate requests the following corrections:

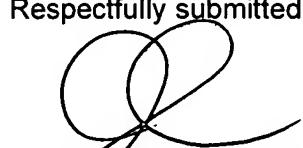

Claim 7, column 6, line 41, replace -- positioning venturi tube -- with "positioning the venturi tube"

The above amendment corresponds to the attached 37 CFR 1.312 Notice of Allowance dated August 5, 2005 as acknowledged and entered by the Examiner.

As the error arose during the printing of the Patent by the Office, no fee is payable.

If you have any questions, please feel free to contact the undersigned at (416) 957-1680.

Respectfully submitted,

Isis E. Caulder – Reg'n No. 47,275

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE REFLECTS A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE APPLIED IN THIS APPLICATION. THE PTOL-85B (OR AN EQUIVALENT) MUST BE RETURNED WITHIN THIS PERIOD EVEN IF NO FEE IS DUE OR THE APPLICATION WILL BE REGARDED AS ABANDONED.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL should be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). Even if the fee(s) have already been paid, Part B - Fee(s) Transmittal should be completed and returned. If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Applicant claims, among other things, pre-mixed fuel burner assembly, including a hollow tubular burner body having a longitudinal

Art Unit: 3749

axis, the burner body having a longitudinal porting area having formed within a plurality of radially formed slots, the burner body having an open end and a closed end, a hollow tubular venturi tube positioned within the burner body along the longitudinal axis extending from the open end, a distribution plate having longitudinal mid-section and flanges, the flanges being coupled to the inside surface of burner body, the mid-section having a plurality of holes formed within, and the distribution plate being positioned within the burner body such that the holes of distribution plate are positioned adjacent to the radially formed slots within the burner body and extending from the open end to the closed end of the burner body.

Applicant further claims a method of making a fuel burner assembly, the method including the steps of forming a tubular burner body having an open end and a closed end, cutting a plurality of radial slots formed within the tubular body, forming a hollow tubular venturi tube and positioning the venturi tube within the burner body along the longitudinal axis extending from the open end partially into the burner body, forming a distribution plate with longitudinal mid-section and flanges, cutting a plurality of holes within the mid-section, and coupling the flanges of the distribution plate to the inside surface of the burner body such that the distribution plate is positioned between the inside surface of the burner body and the venturi tube and such that the holes within the mid-section are positioned adjacent the slots of the burner body.

ECC 13 2006

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. **Rodgers (5,743,727)**, O'Donnell (6,371,753), **Ross (3,156,292)**, and **Riehl (4,118,175)** disclose burners reflecting the general background of the art. Nevertheless, the prior art of record, taken alone or in combination therewith, does not disclose nor make obvious the combination as claimed by applicant.

Ross discloses a premix burner similar to that described in the specification, but besides other deficiencies it lacks the claimed structure. Some of the most glaring differences include a distribution plate **10** positioned outside of the tubular burner body and structure, specifically the crimped portions **29,30,38,39**, that would preclude the method of manufacture recited in the claims. Riehl, while disclosing a true tubular burner that would be conducive to being formed from a hollow tube, is even more deficient in that it has no distribution member at all. Similarly O'Donnell, while reciting a tubular burner body that is capable of being formed from a tube and including tubular venturi tubes, lacks the critical distribution member. Rodgers is closest of the references cited by the examiner and recites a distribution member **30** with holes **38** fails to disclose substantial structure such as the flanges and the manner in which the distributor is connected to the tubular burner. Rodgers is further

deficient in the positioning of the holes that are remote, rather than adjacent, the slots of the tubular burner member.

Of all the references made of record, **Wood (6,461,152)** appears the closest. Cited by applicant and discussed in the specification, this reference fails to disclose or make obvious, alone or in combination with any other reference or knowledge of one of ordinary skill in the art, the claimed invention. Among other shortcomings, it should be noted that Wood fails to disclose holes in the mid-section. While it may be argued that the holes in the flanges are adjacent to the slots of the tubular burner member, they are clearly not as adjacent as they would be according to the claimed recitations. It should also be noted that the tubular member **22** welded to the distribution plate **16** would obstruct and preclude placement of holes in the mid-section as required by the claims. It is well established, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981). Nevertheless, the additional tubular member is central to

the invention disclosed by Wood and would preclude the combination as it teaches away from any placement of holes in the mid-section extending from the open end to the closed end of the burner body.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
